

AYUSH PODDAR

ayush16373@gmail.com • 8827531757 • LinkedIn • GitHub

JABALPUR, Madhya Pradesh

SKILLS

Languages: C++, C, Python JavaScript, SQL

Frameworks & Databases: React.js, Node.js, Express.js, Tailwind CSS, Vite, Socket.io, MongoDB, MySQL

Tools: Git, GitHub, Postman, Render, Cloudinary, Twilio, Razorpay, Docker, Redis, Visual Studio Code

AI/Automation: Prompt Engineering, Airtable, Pinecone, RAG (Retrieval-Augmented Generation), AI Agent Development & Automation, LLM Integration (OpenAI, Gemini), n8n

Concepts: Computer Networks, Database Management System, Operating Systems, Data Structures and Algorithms, Object-Oriented Programming

EDUCATION

Bachelor of Technology in Computer Science Graduation: 2026

Jabalpur Engineering College, Jabalpur, Madhya Pradesh CGPA: 7.7

Senior Secondary (Class XII), Kendriya Vidyalaya (CBSE) Percentage: 93.67%

PROJECTS

RoadSathi - Real-Time Roadside Assistance Platform — MERN Stack, Socket.io

- Built a real-time roadside assistance platform enabling vehicle owners to request emergency help and match with nearby mechanics using MongoDB geospatial indexing (2dsphere) within a 5 km radius.
- Implemented live GPS tracking with Socket.io, streaming mechanic location updates every 5 seconds and rendering real-time movement on an interactive Leaflet map.
- **GitHub:** github.com/ayushpoddar16/RoadSathi • **Live Demo:** RoadSathi

QuestionAI - AI-Powered Academic Assistant — MERN Stack , Google Gemini AI

- Engineered a centralized platform for 1000+ students to upload, organize, and access 500+ previous-year question papers across 10+ branches.
- Implemented adaptive text extraction using Gemini Vision OCR, pdf-parse, and the fs module.
- Built a context-aware AI chatbot for personalized academic guidance and generating practice questions.
- **GitHub:** github.com/ayushpoddar16/QuestionAI • **Live Demo:** Question AI

EXPERIENCE AND ACTIVITIES

Backend Developer Intern — Zoro Innovation - MERN Stack Development Jul - Sep 2025

- Architected a full-stack e-commerce platform using the MERN stack (MongoDB, Express.js, React.js, Node.js), building REST APIs for product catalog, cart, authentication, and order management; integrated Razorpay payment gateway and Twilio WhatsApp API for automated order notifications.

Problem Solving & Technical Achievements

- **Problem Solving:** Solved 400+ coding problems on LeetCode and Coding Ninjas.
- **Technical Skills:** Implemented JWT Authentication, MVC, OTP-based email verification (Node-mailer), file uploads (Multer), and payment integration (Razorpay) in production projects.
